**Corso dottorato in Scienze sociali**

**10 dicembre 2019**

**Claudia Sanguineti**

**Responsabile APRE Liguria – Supporto e consulenza ricerca europea di Ateneo**

**Servizio supporto alla ricerca**

**Area ricerca e trasferimento tecnologico**

# **EU project proposal writing**

Part I - Basic principles

# Project idea

The request for funding starts with the development of a **project idea**

The project idea can arise from different needs:

- scientific curiosity
- idea for development a new product / service / process that can improve productive activities, services or the quality of life of citizens
- face global challenges
- ...

# The project logic

To pass from the initial idea to the project hypothesis it is necessary to summarize:

## ✓ **main objective**

Contribution of the project to the **objectives of the funding programme**

## ✓ **specific objectives**

Sub-objectives through which the final result is intended to be reached– They must be SMART

Specific – target a specific area for improvement

Measurable – quantify or at least suggest an indicator of progress

Achievable – Realistic

Relevant – coherent both with your mission and with the funder's one

Time-bound – specify when the result(s) can be achieved

## ✓ **expected results**

Outputs that allow to verify the achievement of the objectives

## ✓ **activities**

Concrete actions to produce the expected results

# All you need is...

To carry out the project activities you need funding!

The main funding sources are:

- ✓ National and local funding agencies (e.g. MIUR, Region, University)
- ✓ National and international foundations and organisations
- ✓ European Commission

# Aims and objectives of the EC

EC is not the researchers' good fairy

It finances projects for the pursuit of its own institutional goals

It is important to be familiar with the **strategic objectives of EC funding programs** in order to be able to write competitive project proposals

# Horizon 2020

***Horizon 2020*** is the European Commission's main instrument for the funding of research and innovation activities within the European Research Area

It covers the 2014-2020 period, with a budget of **80 billion euros**

It funds research and innovation projects through the publication of calls for proposals

***Horizon Europe*** is the next framework programme (2021-2027), with a budget of **120 B euros**

# H2020 main goals

The program is based on the **Europe 2020 strategy** (and then the **Agenda 2030**) and on the **Innovation Union flagship initiative**

- **smart, sustainable and inclusive growth objectives**
- **research and innovation as key drivers of social and economic prosperity as well as environmental sustainability,**
- **aim to increase research and development expenditure in order to attract private investments**

# WP 2018-2020

«The final Horizon 2020 work programme has the potential to make a real and sustainable difference to the quality of life in the EU, as well as the EU's position in the world such as the implementation of the Sustainable Development Goals (SDG)»

# H2020 main principles

*...To put in your  
suitcase towards  
Horizon Europe*

*Carlos Moedas, 2015 - 3 O Strategy:*

- Open science
- Open innovation
- Open to the world

**Responsible Research and Innovation - RRI**

# Open Science

Principle according to which **every step of the research** should be made **open and available** to everyone for free

Obligation to publish in **Open Access** for all *peer-reviewed publications*

- ✓ **Knowledge** must be for **everyone**
- ✓ The **results of publicly funded research** must be made **public**
- ✓ **Transparency** of the research process
- ✓ **Capitalize** on research results - **New business opportunities**

# Open Innovation

**Open Innovation** concerns the **involvement** of many more actors in the **innovation process**, from **researchers, entrepreneurs, users, governments and civil society**

We need open innovation to **capitalize on the results** of European research and innovation

This means creating the right **ecosystems**, increasing investments and bringing more companies and regions into the knowledge economy

*Carlos Moedas, 3 O Strategy Launch Conference, 22 June 2015*

# Open to the world

Participants from **all over the world**, regardless of their place of origin or residence, can participate in most H2020 calls

## Automatically eligible for funding:

- EU Member States
- Countries associated with the program (e.g. Switzerland, Israel, Norway)
- Developing countries

## Not automatically eligible for funding

- Industrialized countries and emerging economies

Some industrialized third countries created mechanisms to co-finance their participants in the H2020 actions. Funding is possible in exceptional cases

## And what about UK????

# UK: 2 scenarios

Deal?

Participants from the UK can continue to submit proposals as partners and as coordinators also for 2020 calls

Participants from the UK continue to be funded until the end of ongoing projects

No deal?

UK government committed itself to fund projects approved in H2020 that have submitted proposals until 2020

UK government committed itself to continue to fund these projects until their end

# RRI

## *Responsible Research and Innovation:*

**Social actors** (researchers, citizens, policy makers, companies, third sector organizations, etc.) must **work together** during the entire research and innovation process in order to better align both the process and its results with **values, needs and expectations** of the society

### **Key elements**

- public engagement
- open access
- gender
- ethics
- science education

# **The structure of Horizon 2020**

# 3 Pillars

Excellent science	Industrial Leadership	Societal challenges
<ul style="list-style-type: none"> <li>• European Research Council (ERC)</li> <li>• Future &amp; emerging technologies</li> <li>• Marie Skłodowska-Curie Actions</li> <li>• Research infrastructures (including e-infrastructure)</li> </ul>	<ul style="list-style-type: none"> <li>• Leadership in enabling &amp; industrial technologies (LEITs) - <i>ICT, nanotechnologies, materials, biotechnology, manufacturing, space</i></li> <li>• Access to risk finance</li> <li>• Innovation in SME</li> </ul>	<ul style="list-style-type: none"> <li>• Health, demographic change &amp; wellbeing</li> <li>• Food security, sustainable agriculture and forestry, marine/maritime/inland water research and the bioeconomy</li> <li>• Secure, clean &amp; efficient energy</li> <li>• Smart, green &amp; integrated transport</li> <li>• Climate action, environment, resource efficiency &amp; raw materials</li> <li>• Inclusive, innovative &amp; reflective societies</li> <li>• Secure societies</li> </ul>

Science with and for Society		
Non-nuclear direct actions of the JRC		

## HORIZON 2020 BUDGET (EUR 78.6 billion, current prices)

# Excellent science

**World class science** is the basis for creating technologies, jobs and the well-being of tomorrow

Europe must develop, attract and retain research talent

Researchers need access to the best infrastructure

Actions:

- **European Research Council (ERC)**  
Frontier research by the best **individual teams** (ERC Starting Grant, Consolidator Grant, Advanced Grant)
- **Future & emerging technologies**  
Collaborative research to open new fields of innovation
- **Marie Skłodowska-Curie actions (MSCA)**  
Opportunities for training and career development
- **Research infrastructures (including e-infrastructure)**  
Ensuring access to world-class facilities

# Industrial Leadership

Strategic investments in **key technologies** (such as advanced production, microelectronics) support innovation between existing and emerging sectors

Europe must **attract more private investment** in research and innovation

Europe needs more **innovative SMEs** to create **growth and jobs**

**Actions:**

**Leadership in enabling & industrial technologies (LEITs)**

(ICT, nanotechnologies, materials, biotechnology, manufacturing, space)

**Access to risk finance**

Leveraging private finance & venture capital

**Innovation in SMEs**

Fostering all forms of innovation in all types of SMEs

# Societal challenge

The concerns of citizens and EU policy objectives (climate, environment, energy, transport, etc.) cannot be addressed without innovation

Innovative solutions come from multidisciplinary collaborations, including social sciences and humanities

The promising solutions must be tested, demonstrated also on a large scale

## Actions:

- Health, demographic change & wellbeing
- Food security, sustainable agriculture and forestry, marine/maritime/inland water research and the bioeconomy
- Secure, clean & efficient energy
- Smart, green & integrated transport
- Climate action, environment, resource efficiency & raw materials
- **Europe in a changing world: Inclusive, innovative & reflective societies**
- Secure societies

# How to find the call

The screenshot displays the European Commission's 'Funding & tender opportunities' portal. The header includes the European Commission logo and the text 'Single Electronic Data Interchange Area (SEDIA)'. Navigation links include 'Register', 'Login', and 'select programme'. The main navigation bar features 'SEARCH FUNDING & TENDERS', 'HOW TO PARTICIPATE', 'PROJECTS & RESULTS', 'WORK AS AN EXPERT', and 'SUPPORT'. A blue banner highlights the 'Horizon 2020 Framework Programme (H2020)'. On the left, a search sidebar allows filtering by 'GRANTS' (checked) and 'TENDERS', and by submission status: 'FORTHCOMING', 'OPEN', and 'CLOSED'. The main content area shows 'Funding and tenders' with '352 results'. Sorting options are 'opening date' (selected), 'title', 'ID', and 'deadline'. There are icons for a calendar and RSS feed, with text: 'Download all funding and tender opportunities to your calendar or subscribe to the RSS feed (unfiltered)'. An 'Online manual' button with the text 'Find a grant' is also present. A search result is visible: 'Grant Pan-European advanced manufacturing assistance and training for SMEs INNOSUP-08-2020'.

<https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/home>

# Calls approach

H2020 Calls for proposals can have:

## Bottom up approach

There are **no predefined themes**, it is possible to present proposals in **any disciplinary field**

Measures that work with the bottom-up approach:

- ERC
- Marie Skłodowska-Curie Action
- FET Open
- SME Instrument (now EIC Pilot)

## Top down approach

The Commission identifies the **TOPICs** covered by the calls, described in the **Work programmes**

Prevailing in:

- Industrial leadership
- Societal challenge

# Work Programmes

Funding opportunities under Horizon 2020 are established in multiannual Work Programmes (WPs)

WPs are prepared by the EC through a strategic planning process that integrates EU policy objectives in setting priorities

The screenshot shows the 'Funding & tender opportunities' portal. The top navigation bar includes 'HOW TO PARTICIPATE' (highlighted), 'PROJECTS & RESULTS', 'WORK AS AN EXPERT', and 'SUPPORT'. Below this, the 'Framework Programme (H2020)' section is visible. A search filter is set to 'Framework Programme (H2020)'. The main content area is titled 'Reference Documents' and contains a list of documents under the 'Main WP' category:

- 1. Introduction 2018-20\_v2.0 >
- 2. Future and Emerging Technologies (FETs) 2018-20\_v3.0 >
- 3. Marie Skłodowska-Curie actions (MSCA) 2018-20\_v2.0 >
- 4. Research infrastructures (including e-infrastructures) 2018-20\_v3.0 >
- 5. Introduction to Leadership in enabling and industrial technologies (LEITS) 2018-20\_v1.0 >
- 5i. Information and communication technologies (ICT) 2018-20\_v3.0 >

# Call - Topic

Topic

# Topic description

## **MIGRATION-09-2020: Narratives on migration and its impact: past and present**

### **Specific Challenge**

The way we collectively discuss about migration has an impact on the production of policies and responses to address this phenomenon. Narratives on migration -be it in the media, public or political discourses- affect political processes across Europe, influence our perceptions on migration dynamics and ultimately have an effect on the integration of migrants in our societies...

### **Scope**

Proposals should address the dynamics and developments of migration narratives at local, national and EU level...

### **Expected Impact:**

Practitioners will be informed by the new knowledge produced on the consequences of discourses on migration. This may have an impact on their conduct and policy choices when relevant. Projects will improve access and dissemination of information on narratives of migration and their effects including their scale, patterns and the social and economic impact on host societies...

**Total budget: 9 million euro. Suggested size per project: 3 million euro**

# Proposal template

**Part A – Administrative form**

**Part B – Scientific proposal**

# Part B – Section 1-3

## 1. Excellence

- 1.1 Objectives
- 1.2 Relation to the work programme
- 1.3 Concept and methodology
- 1.4 Ambition

## 2. Impact

- 2.1 Expected impacts
- 2.2 Measures to maximise impact
  - a) Dissemination and exploitation of results
  - b) Communication activities

## 3. Implementation

- 3.1 Work plan – Work packages, deliverables
- 3.2 Management structure, milestones and procedures
- 3.3 Consortium as a whole
- 3.4 Resources to be committed

# Part B – Section 4-5

## Section 4: Members of the consortium

4.1. Participants (applicants)

4.2. Third parties involved in the project (including use of third party resources)

## Section 5: Ethics and Security

5.1 Ethics

5.2 Security

# Proposal submission

Proposals must be submitted electronically, through the Submission System of the Funding and Tender portal

The screenshot shows a web interface for proposal submission. On the left is a vertical navigation menu with links: description, tions and documents, er Search, ission service, pport, formation, and back to search results. The main content area is titled "Select your type of action to start submission". It contains two paragraphs of text: "To access the Electronic Submission Service, please click on the submission-button next to the type of action that corresponds to your proposal. You will then be asked to confirm your choice of the type of action and topic, changed in the submission system. Upon confirmation, you will be linked to the correct entry point." and "To access existing draft proposals for this topic, please login to the Participant Portal and select the My Proposals page of the My Area section." Below this, there is a section "Type of Action: Innovation action [ IA]" with a yellow "Start SUBMISSION" button. Further down is a "Get support" section with two buttons: an orange button with a book icon labeled "Online manual 'Submit a proposal'" and a green button with an "it" icon labeled "IT HOW TO 'Submission of Proposals'". At the bottom left of the main area is a "Go to top" link with an upward arrow icon.

# **EU project proposal writing**

Part II – Evaluation criteria

# 3 evaluation criteria

H2020 Proposals are evaluated by panels of independent experts against:

## Excellence

## Impact

## Implementation

# Excellence

## Clarity and **relevance** of the **objectives**

Demonstration that the proposed work goes **beyond the state of the art** and demonstrates the potential for innovation (for example innovative objectives, new concepts and approaches)

Appropriate consideration of **interdisciplinary approaches** and **gender aspects**

# Impact

The extent to which project results would **contribute** to each of the expected **impacts** mentioned in the work program under the relevant topic

Any impacts not mentioned in the WP, which may:

- increase the **capacity for innovation, create new market opportunities,**
- strengthen the **competitiveness** and growth of businesses,
- address issues related to **climate change** or the environment,
- make other important **societal benefits**

# Implementation

**Quality** and **effectiveness** of the **work plan**, including the extent to which the resources assigned to the work packages are in line with their objectives and results

Adequacy of the **management structure** and procedures, including **risk management** and **innovation**

**Complementarity** of the **participants** and the extent to which the overall consortium brings together the necessary skills

# Common errors - Excellence

- The underlying concept of using an XXX approach is, in general, sound. However, the **methodology**, although overall credible, **lacks some important details**
- How **stakeholder** knowledge will be incorporated is **not well described**
- The **individual objectives** are generally clearly described and they are adequate for the proposed work. Each objective is convincingly matched to the specific challenges in the work programme. However, a minor weakness is that the **overall objectives** are **not explained in sufficient clarity**
- The **progress beyond state of the art** is not sufficiently elaborated
- Some **objectives** are **not sufficiently quantified**

# Common errors - Impact

- **Indicators** to measure impact are not appropriately addressed
- **Plans to exploit** the results of the project are not well elaborated
- The description of the **communication activities** is too general
- The proposal does not convincingly present substantial **impacts not mentioned in the work programme**. The proposal states that new companies and business models would emerge, but it does not address the commercial aspects in sufficient detail
- The and exploitation plans are adequately presented, but there are dissemination some shortcomings in terms of identifying the **target groups and communication channels**
- The proposal carefully analyses the barriers which could affect the achievement of the expected impacts. However, some of the expected impacts mentioned in the work programme are not sufficiently addressed
- However, the **joint exploitation** of results by the consortium is insufficiently addressed
- The exploitation approach is adequate, however the **IPR strategy is not sufficiently detailed** in the proposal which is a shortcoming

# Common errors - Implementation

- The work plan is, overall, coherent. However, there are a number of issues. For example, **the proposal does not** adequately **justify** the large amount of **effort** allocated to dissemination and project management
- **Risk management plans** are underestimated and not well elaborated. **Mitigation measures** are not sufficiently convincing. **Innovation management** is not well addressed, given the ambition of the proposed work.
- However, the **risk analysis** is too generic and incomplete.
- **Innovation management** is not convincingly described
- However, the **duration** of some tasks is not quite aligned with the envisioned time plan for their outputs. Some work package leaders have **low resources** per WP they lead which could pose an **implementation risk**.
- Some relevant **risks** in relation to the **project implementation** are not sufficiently identified

**Thank you for your attention!**
